

Transforming Care, Close to home.

AT BAYSTATE MARY LANE, we are planning for the future. We were founded in 1909 and are reinventing how we deliver care in 2016 to continue to meet our community's health care needs.

In today's world, more care is delivered in doctor's offices than in the past. Many surgical procedures are completed in the course of a day, so patients can be back in the comfort of their homes sooner. And, patients look for quick access and convenience when it comes to emergency care, physical therapy, getting x-rays, having blood drawn, or getting in to see a doctor. We are responding to these needs and focusing on growing emergency and outpatient services for Ware and surrounding communities.

Our range of outpatient services continues to expand as we hire and bring more specialists to the area – including cancer, cardiology, and surgery – providing an exceptional level of care, close to home. Our Emergency Department has been rated among the best in the state for wait times and getting patients treated quickly. In fact, we pledge that our patients will be seen by a provider in 30 minutes or less. Our care is local and we are part of a nationally-recognized health system, Baystate Health.

We have been caring for our community for over 100 years. Now, we are transforming care so we can ensure excellent care for generations to come.

Mike F. Moran
President & Chief Administrative Officer
